

PRASAM PRADHAN

Project Manager | Engineering Leadership & Delivery Ownership

+977 9845766662 | mailprasam7@gmail.com | linkedin.com/in/prasam-pradhan-65b181252 | Lalitpur, Nepal

PROFESSIONAL SUMMARY

Project Manager who takes full ownership of delivery, from strategy to shipped product. Leads and develops engineering teams, builds the processes that let them do their best work, and is accountable end-to-end for outcomes rather than tasks. Track record of turning ambiguous business problems into executed roadmaps, growing junior engineers into confident contributors, and protecting delivery commitments even under shifting priorities. Comfortable being the final point of accountability for a product, a team, and a timeline.

PROFESSIONAL EXPERIENCE

Project Manager | Revvlow Tech Pvt. Ltd.

Mar 2026 – Present

- Own end-to-end delivery of a consumer mobile application for the Nepalese market, holding full accountability for scope, timeline, and quality from concept through launch — not just coordinating it, but making the calls when trade-offs are needed.
- Lead and develop a cross-functional engineering team, mentoring individual developers on technical decision-making, code quality standards, and ownership habits so they grow beyond task execution into independent problem-solvers.
- Set the product and delivery strategy, running sprint planning and backlog prioritisation in Jira, and personally hold the team to roadmap milestones — achieving 100% SLA adherence across all project phases.
- Built the team's workflows and accountability structures from the ground up, raising delivery velocity and giving engineers clear ownership of their components rather than working ticket-by-ticket.
- Drive feature prioritisation and product strategy from user research and stakeholder input, translating ambiguous requirements into a lean, high-impact MVP roadmap.
- Run weekly stakeholder reviews as the single point of accountability for capacity, risk, and delivery status, resolving blockers directly rather than escalating them.
- Maintain project documentation, risk registers, and delivery trackers in Confluence, ensuring the team's work is transparent and audit-ready at every stage of the SDLC.

Software Development Intern | Professional Computer Systems

Dec 2025 – Mar 2026

- Took ownership of features across the full Software Development Lifecycle on Java-based enterprise projects, from requirements through deployment.
- Operated within an Agile team, contributing to sprint ceremonies and iterative delivery while holding own workstreams to defined timelines.
- Acted as a translation layer between client requirements and the development team, converting ambiguous asks into clear technical specifications.
- Drove QA testing and debugging, taking responsibility for defect resolution ahead of release rather than waiting to be assigned issues.
- Worked under the mentorship of Shaika Niraula (Senior Java Developer), building the enterprise delivery instincts now applied to leading own team.

Technical Business Analyst Intern | Ncell

May 2024 – Jul 2024

- Independently owned a digital transformation initiative end-to-end, delivering a cost saving of over NPR 5 Lakhs (~USD 3,700) in operational expenditure.
- Led workflow analysis and stakeholder interviews to document AS-IS processes, identify inefficiencies, and design optimised TO-BE workflows.
- Coordinated across technical and business units, gathering requirements, aligning priorities, and driving project execution to agreed timelines.
- Produced business requirement documents (BRDs) and workflow optimisation reports that were adopted directly by the operations team.

EDUCATION

Vellore Institute of Technology (VIT), India 2022 – 2026

Bachelor of Technology (B.Tech) — Computer Science Engineering

Kathmandu World School, Nepal 2019 – 2021

Higher Secondary (NEB +2) — Science

GEMS School, Lalitpur, Nepal 2019

Secondary Education Examination (SEE)

KEY PROJECTS

Mobile Application — Nepal Market (2026)

- Own product strategy and delivery for a consumer mobile app from concept to launch, leading the engineering team through sprints, release planning, and stakeholder reporting.

Digital Operations Transformation — Ncell (2024)

- Designed and led a digitalisation initiative that eliminated manual processes, reduced operational costs by NPR 5+ Lakhs, and improved workflow efficiency across departments.

LEADERSHIP & ACHIEVEMENTS

- Delivered cost savings of NPR 5+ Lakhs at Ncell through an independently led digital transformation project, recognised by operations leadership.
- Own and run a complete mobile product lifecycle as Project Manager — from ideation and stakeholder alignment to sprint execution and milestone delivery — with zero missed deadlines.
- Consistently bridge technical-business communication gaps across organisations, turning complex requirements into delivery plans engineering teams can execute against.

Riviera, VIT University — Special Event Manager, Special Guest Care Committee (Jan–Mar 2025)

- Selected from 20+ candidates to lead VIT's flagship cultural fest, one of Asia's largest university events.
- Led and held accountable a team of 25, managing logistics, scheduling, and on-ground execution across multiple event days.

graVITas, VIT University — Special Event Manager, International Relations Committee (Aug–Oct 2025)

- Led a team of 30 within the International Relations Committee for VIT's flagship international tech fest, owning coordination with partner universities globally.
- Managed stakeholder relationships across multiple institutions simultaneously, demonstrating cross-cultural negotiation and partnership management.

graVITas, VIT University — Special Event Coordinator, Transport and Logistics Committee (Aug–Oct 2024)

- Coordinated event operations for VIT's international technical symposium across planning, communication, and on-site delivery.
- Progressed to a managerial role the following year on consistent performance; recognised with a Certificate of Recognition for outstanding contribution.

SKILLS & COMPETENCIES

Leadership: Team Leadership & Mentoring · Engineering Talent Development · Ownership & Accountability · Delivery Strategy

Delivery: SLA & Capacity Management · Sprint Planning & Delivery · Agile / Scrum · Requirements Gathering · Stakeholder Management

Tools: Jira & Confluence · Process Documentation · Data Analysis (Excel / Sheets) · Business Analysis

Technical: Java · Python · HTML/CSS

LANGUAGES

Nepali (Native) · English (Fluent) · Hindi (Proficient)
